18440 Cyclopes Lubricator and Whip Hose Manual

Description: The Widder 18440 is an in-line lubricator for pneumatic tools

Capacity and Specifications: 2.5 oz. capacity, 1/2" ID 300 PSI WP Airline x 6' Whip with Universal Crow's Foot Twist Input and 1/4", 3/8". & 1/2" Male NPT Output.

Advantages: Large – 2.5 oz capacity for long use. Only the Cyclopes has a single sight glass and fill cap – this allows the operator to see oil fill level, setting, and operation in one glance. The Cyclopes Lubricator and Whip uses NBR 300 PSI Hose – one of the most oil resistant hoses on the market. The 2 ear stainless clamps are guaranteed to withstand 1200 PSI of pressure without separating.

Parts list available @ www.highprecisioninc.com

Safety Precautions and Operation:

Disconnect Before Servicing. Be sure airline and lubricator are disconnected from pressure source before adding Widder Air Tool Lubricant. The Widder 18440 Lubricator has a Safety Relief feature in the cap. Unscrew Oil Fill Cap slowly to detect and relieve any residual pressure.

Setting Flow: The Widder 18440 Lubricator can be set from very low to high flow by adjusting the internal screw within the Oil Fill Chamber. Following the safety precautions above, adjust the flow by turning the screw mark. Highest flow is screwed all the way out to the stop (counter-clockwise). Lowest flow is reached by screwing the screw all the way in (clockwise)

18440 Cyclopes Lubricator and Whip Hose Parts List

Replacement Parts: Cap/Sight-Glass Assembly and the Adjusting Valve Assembly are factory assembled and non-serviceable - replace with new Widder components if required.
